

# FISH

The right solution for transport of fresh, deep frozen, catering and sea products.

## Your business:

- **Optimize** deliveries
- **Possess** an optimum loading capacity, in one or other temperature.
- **Deliver** B to B and B to C
- **Beneficiate** of a temperature controlled transport bodywork which can also be used as storage

## KLÉGÉ-EUROP solutions:

- Tailor made, on platform cab or rigid
- Several possibilities of panel composition
- Interior fittings can be amended during the bodywork lifetime
- Protection strip and load lock for loading security
- Bodywork available for all range of vehicles (from 1 to 100 CBM)
- Standard structure with non-slip or smooth polyester coating, special fish man floor finishing (GRP going up 50 mm on the side and front panel)
- Fixed or folding shelves, depth on demand
- Second floor

**In respect of the most exigent rules, yours!**

KLÉGE-EUROP is :

### Conformity:

Bodywork with CEMAFROID approval:  
Ensures respect of ATP norms

### Time efficiency:

Bodybuilder certified by UTAC: Allows  
on site refrigerated vehicles probation.

### Security:

System that identifies, evaluates on  
controls significant dangers regarding  
alimentary security.
